Der-Brief@yandex.ru

The AeroSpace Lyceum is a municipal budget general educational institution providing the high level of education in:

- ✓ physics and mathematics;
- ✓ natural science;
- ✓ humanitarian science.

Studying at the Aerospace Lyceum has its advantages: high-quality education, real good chances to enter the best universities, high results at the state final certification, democratic oral-writing interviews for admission to the Lyceum after 6 and 7 class of an ordinary school.

There are 366 students in 7-11 grades. The teaching staff of the Lyceum consists of 46 teachers, among them 22 are highly-qualified.

History

Special Secondary school №98 opened with the study of Aircraft design and construction. The school was given the status of lyceum in 1990. On 12th of April 1992 the Aerospace Lyceum was awarded the name of Y. V. Kondratyuk.

The main aim of the lyceum is to form future of engineering specialists through the interest in aviation and cosmonautics.

The plan of study includes air-space subjects such as Introduction to Aviation and Space Flights, Basis of Mechanics, Constructions of Airplanes, Air Modeling, Astro Physics.

Within the walls of the Lyceum begins theoretical and practical training of secondary and high school students for research work under the guidance of Novosibirsk State University, Novosibirsk State Technical University, Siberian State University of Telecommunications and Information Sciences and Siberian Aeronautical Research Institute named after S.A. Chaplygin.

Life in the Lyceum means:

- ✓ participation in different international and local conferences (International Scientific Conference «Gagarin's Readings», International Scientific Conference «Reshetnev's Readings»);
- ✓ intensive and interesting studying;
- ✓ participation in a lot of different Russian contests, more than 50 students became the laureates and winners of «Russian's National Treasures», Saint-Petersburg High School Science Conference «Intellectual Revival»;
- ✓ aero-space game which includes work of different age teams, travelling to imaginary planets, launching hand-made models and rest on the Ob Sea Coast.
- ✓ the students' choice of activities according to their interests;
- ✓ the chance to enter Moscow Bauman Technical University;
- ✓ extra-curricular activities such as sports (volleyball and basketball sections, table-tennis team), glider aircraft modeling, dance and theatre.
